Experience

Freelance Web Developer, Malden, MA

June 2024 - Present

- **Develop proof of concepts for potential employers and clients** utilizing React.js, Next.js, Redux, Javascript/Typescript, RESTful APIs, GraphQL, Node.js, Express, Wordpress, SQL, MongoDB, and Mongoose.
- **Advise clients on how to optimize their sites to improve user experience and comply with WCAG accessibility.**

Perficient, Somerville, MA

Senior Frontend Developer | Technical Consultant, January 2020 – April 2024

- **Developed the frontend of responsive consumer/intranet websites** across multiple industries using React.js, Vue.js, JavaScript (ES6), Sitecore CMS and SXA, SCSS/SASS, HTML5, Bootstrap, and compilers such as Grunt and Webpack.
- **Translated designs into reusable web components that complied with WCAG Accessibility Standards.**
- **Led frontend development teams** by providing coding standards, creating and assigning tasks, leading daily standups, performing code reviews, and addressing any questions or issues within the team for Sitecore Projects.
- **Collaborated with backend developers on building and consuming RESTful APIs** for client projects.
- **Developed sites that utilized CI/CD Pipelines using Azure Dev-Ops and Git version control.**
- Communicated between the offshore and US development, design, and QA teams in an agile environment to coordinate development, task prioritization, usability testing, and technical design reviews.
- Investigated and resolved bugs that are identified on production sites.

- Advised clients on what web technologies are best to be implemented for their websites and assisted in finalizing technical requirements and designs with Figma.
- Provided estimates for development work.
- Onboarded new hires to ensure success in their agency work.
- Migrated content between client sites.

MedTouch, Somerville, MA (Acquired by Perficient)
UI to Senior UI Developer, August 2015 - December 2019

- **Responsible for the frontend development of responsive consumer/intranet websites** for hospitals and healthcare networks using Vue.js, Sitecore CMS and SXA, JavaScript (ES6), SCSS/SASS, HTML5, Bootstrap, and compilers such as Grunt and Webpack .
- **Translated designs into reusable web components that complied with WCAG Accessibility Standards.**
- **Converted/updated legacy code and solutions** to today's web industry standards.
- **Collaborated with backend developers on building and consuming RESTful APIs** for client projects.
- Investigated and resolved bugs that are identified on production sites.
- **Utilized BEM and Atomic Design Methodologies** to create stable, reusable, and manageable code.
- Coordinated between development, design, and QA teams to establish development work, task prioritization, usability testing, and technical design reviews.
- **Developed sites in an agency Agile environment that utilized CI/CD pipelines and Git version control.**
- Provided estimates for development work for the sales teams' scale of work documents.
- Advised clients on what web technologies are best to be implemented for their websites.

DST Customer Communications, Quincy, MA
Web UX/UI Developer, April 2011 – August 2015

- **Responsible for the frontend development** of product-site integration and web application projects using Javascript, JQuery, Bootstrap, CSS, and HTML
- **Collaborated with the design and backend development teams on projects** through brainstorming, white boarding, and documentation sessions.
- **Gathered user research data through interviews and user testing** with our clients and employees for designing web mockups and wireframes using Photoshop and Illustrator.
- **Provided design flats and technical documentation** for our clients and employees.
- Setup, proofread, and deployed html email templates through an email services platform.
- **Developed sites in an agency agile environment that utilized CI/CD pipelines.**
